Author Index Volume 127 (2002)

Abd El-Wahed, W.F., *see* M.H. Rasmy (2) 209–220

Ban, A.I. and **S.G. Gal,** On the defect of additivity of fuzzy measures (3) 353–362
Bang, W.-C., *see* Z. Bien (1) 3– 16
Bien, Z., W.-C. Bang, D.-Y. Kim and **J.-S. Han,** Machine intelligence quotient: its measurements and applications (1) 3– 16

Casasnovas, J., M. Monserrat and **F. Rosselló,** On the semilattice of inner extensions of a fuzzy partial algebra (3) 383–390
Cha, S.D., *see* S.S. So (2) 199–208
Chang, C.-Y., *see* C.-L. Chen (2) 165–176
Chen, C.-L., D.-Y. Sun and **C.-Y. Chang,** Numerical solution of dynamic optimization problems with flexible inequality constraints by iterative dynamic programming (2) 165–176

Deng, J.-M., *see* Y. Li (1) 85– 97
Dourra, H. and **P. Siy,** Investment using technical analysis and fuzzy logic (2) 221–240
Duh, F.-B., *see* C.-T. Lin (1) 37– 48

El-Sherbiny, M.M., *see* M.H. Rasmy (2) 209–220

Fang, J.-X., A note on the convergence theorem of generalized fuzzy integrals (3) 377–381
Fang, S.-C., *see* A.L. Medaglia (1) 65– 84
Fang, S.-C., *see* J. Loetamonphong (2) 141–164
Fullér, R., M. Kovács and **G. Schuster,** Flexible linear programs with a restricted overall flexibility level (2) 177–183

Gal, S.G., *see* A.I. Ban (3) 353–362
Gong, Z., C. Wu and **B. Li,** On the problem of characterizing derivatives for the fuzzy-valued functions (3) 315–322

Hadžić, O. and **E. Pap,** A fixed point theorem for multivalued mappings in probabilistic metric spaces and an application in fuzzy metric spaces (3) 333–344
Han, J.-S., *see* Z. Bien (1) 3– 16
Hashem, K.A. and **N.N. Morsi,** Fuzzy T-neighbourhood spaces: Part 1—T-proximities (3) 247–264
Hashem, K.A. and **N.N. Morsi,** Fuzzy T-neighbourhood spaces: Part 2—T-neighbourhood systems (3) 265–280
Huang, H.-P. and **C.-C. Liang,** Strategy-based decision making of a soccer robot system using a real-time self-organizing fuzzy decision tree (1) 49– 64

Ip, W.H., *see* C. Wang (2) 117–129

Kim, D.-Y., *see* Z. Bien (1) 3– 16
Kovács, M., *see* R. Fullér (2) 177–183
Kuchta, D., A generalisation of an algorithm solving the fuzzy multiple choice knapsack problem (2) 131–140
Kwon, Y.R., *see* S.S. So (2) 199–208

Lee, E.S., *see* X.-h. Yuan (3) 291–297
Lee, J. and **H.-F. Wang,** Preface (1) 1– 2
Lee, S.M., *see* M.H. Rasmy (2) 209–220
Li, B., *see* Z. Gong (3) 315–322
Li, H., *see* X.-h. Yuan (3) 291–297
Li, X., *see* G. Wang (3) 363–370
Li, Y., J.-M. Deng and **M.-Y. Wei,** Meaning and precision of adaptive fuzzy systems with Gaussian-type membership functions (1) 85– 97
Liang, C.-C., *see* H.-P. Huang (1) 49– 64
Lin, C.-T., F.-B. Duh and **D.-J. Liu,** A neural fuzzy network for word information processing (1) 37– 48
Liu, D.-J., *see* C.-T. Lin (1) 37– 48
Liu, P., Analysis of approximation of continuous fuzzy functions by multivariate fuzzy polynomials (3) 299–313
Loetamonphong, J., S.-C. Fang and **R.E. Young,** Multi-objective optimization problems with fuzzy relation equation constraints (2) 141–164
Luo, X., A new approach to sum-fuzzy rational choice functions (2) 241–246

Medaglia, A.L., S.-C. Fang and **H.L.W. Nuttle,** Fuzzy controlled simulation optimization (1) 65– 84
Minkler, G., *see* J. Minkler (3) 281–289

Elsevier Science B.V.
PII: S0165-0114(02)00067-2

Minkler, J., G. Minkler and **G. Richardson,** Regularity in fuzzy convergence spaces (3) 281–289
Monserrat, M., *see* J. Casasnovas (3) 383–390
Morsi, N.N., *see* K.A. Hashem (3) 247–264
Morsi, N.N., *see* K.A. Hashem (3) 265–280

Nishizaki, I., *see* M. Sakawa (2) 185–197
Nuttle, H.L.W., *see* A.L. Medaglia (1) 65– 84

Pap, E., *see* O. Hadžić (3) 333–344

Ragab, A.M., *see* M.H. Rasmy (2) 209–220
Rasmy, M.H., S.M. Lee, W.F. Abd El-Wahed, A.M. Ragab and **M.M. El-Sherbiny,** An expert system for multiobjective decision making: application of fuzzy linguistic preferences and goal programming (2) 209–220
Richardson, G., *see* J. Minkler (3) 281–289
Rosselló, F., *see* J. Casasnovas (3) 383–390

Sakawa, M. and **I. Nishizaki,** Interactive fuzzy programming for two-level nonconvex programming problems with fuzzy parameters through genetic algorithms (2) 185–197
Schuster, G., *see* R. Fullér (2) 177–183
